# DETAILED ACTION

This communication is responsive to the amendment filed 02/15/2008.

Pursuant to Applicant's arguments filed 02/15/2008, the Examiner concedes that the cited art - Gensel et al. (US 20050028162 A1) - does not teach all the claim limitations. The finality of the previous office action is vacated.

Claims 1-21 are currently pending in this application.

Applicant has amended claims 15-21 to overcome the 35 USC § 101 rejection. The prior 101 rejection is withdrawn.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 551(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Gensel (US

20030200532 A1).

As to claim 1:

an application source file and a project file of the application source file; receiving a resource identifier from the application source file indicating a resource to be utilized by the application, wherein the resource identifier does not indicate a protocol or a location for the resource; locating the resource based on the resource identifier and the code generated during compilation of the application; and returning the resource to the application (see the Abstract: \$10010-0014; 0037-0051; and 0071-0082; see also, Figs. 1-

Gensel teaches a method of resource lookup comprising; generating a code by compiling

12).

## As to claim 2:

Gensel teaches receiving the resource identifier from the application source file comprises receiving the resource identifier via an Application Program Interface (see ¶¶ 0014, 0083-0084; see also, Figs. 1-12).

Page 4

### As to claim 3:

Gensel teaches the resource identifier is a string representing a name of the resource (see ¶¶ 0012 and 0076-0077; see also, Figs. 1-12).

#### As to claim 4:

Gensel teaches the code generated during compilation of the application comprises a switch statement having one or more cases (see ¶¶ 0017; 0048; and 0075; see also, Figs. 1-12).

### As to claim 5:

Gensel teaches each case of the switch statement comprises resource information identifying the resource indicated by the resource identifier (see  $\P$  0017-0028; see also, Figs. 1-12).

Art Unit: 2194

## As to claim 6:

Gensel teaches returning the resource to the application comprises returning an object that is an instance of a class of the resource (see ¶0010-0014; 0037-0051; and 0071-0082; see also, Figs. 1-12).

### As to claim 7:

Gensel teaches returning the resource comprises returning an open stream to the resource (see \$\\$0010-0014; 0037-0051: and 0071-0082; see also, Figs. 1-12).

#### As to claims 8-14:

Note the rejection of claims 1-7 above. Claims 8-14 are the same as claims 1-7, except claims 8-16 are system claims and claims 1-7 are method claims.

#### As to claims 15-21:

Note the rejection of claims 1-7 above. Claims 15-21 are the same as claims 1-7, except claims 15-21 are machine-readable medium claims and claims 1-7 are method claims.

Application/Control Number: 10/783,767 Page 6

Art Unit: 2194

### Conclusion

The prior art made of record, see PTO 892, and not relied upon is considered pertinent to
applicant's disclosure. Applicant should review these references carefully before
responding to this office action.

### Contact Information

 Any inquiry or a general nature or relating to the status of this application should be directed to the TC 2100 Group receptionist; (571) 272-2100.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to VAN H. NGUYEN whose telephone number is (571) 272-3765. The examiner can normally be reached on Monday-Thursday from 8:30AM-6:00PM. The examiner can also be reached on alternative Friday. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, MENG-AI AN can be reached at (571) 272-3756.

The fax phone number for the organization where this application or proceeding is assigned is  $(571)\ 273-8300$ .

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
